

Double Lock

The OMG-Why-Is-It-So-Hard-to-Defeat?-Tag

The Double Lock EAS tag features a patented release mechanism that makes this tag impervious to common defeat attempts. In two use cases, this EAS tag was able to reduce shrink by 40% and 60% respectively (ask your Prosegur representative for more details). And as a special bonus, the Double Lock detacher is compatible with your existing SuperTags and requires no additional training for your associates.

KEY FEATURES

- > Highly tamper resistant
- > Extra-tough construction
- > Easy application and removal
- > Double Lock power detacher is compatible with SuperTags, pins and lanyards
- > No special training needed for usage
